PROFILE SUMMARY

A CSE student at VIIT Pune with experience in full-stack development, GenAI, AI/ML, Blockchain System. Strong programming foundation in C, C++. Skilled in building practical, innovative solutions and active in hackathons. National Reliance Foundation Undergraduate Scholar, Enjoy solving real-world problems through clean, efficient code and contributing effectively in collaborative environments.

EDUCATION

Vishwakarma Institute of Information Technology, Pune <i>B.Tech in Computer Science Engineering</i> — CGPA: 8.92	2023 – 2027
HSC Board Marks: 82.17	2022 – 2023
SSC Board Marks: 98.60	2020 – 2021

WORK EXPERIENCE

Austere Systems Limited, Pune <i>Software Developer</i>	June 2025 – Oct 2025
- Contributed to the design and development of responsive user interfaces for client-facing web applications. - Collaborated with cross-functional teams to align frontend behavior with backend APIs and project goals.	

SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL
Frontend: HTML, CSS, React, Next.js, Tailwind CSS
Backend: Node.js, Flask, REST APIs, FastAPI
Databases: MySQL, MongoDB, Firebase
Generative AI & Data Science: LLMs, Generative AI, NLP, AI Inference, PyTorch, TensorFlow
Cloud & Analytics: AWS, Power BI, Tableau
Tools & Technologies: Git/GitHub, Linux, VS Code, Matplotlib, WordPress
UI/UX & Design: UI/UX Design

PROJECTS

- Farmazo** | [Link](#)
- Cross-platform app enabling farmers to sell crops directly to companies. Features include farmer/company registration, crop listings, contract management, and live market prices.
 - This project has AI models for future crop planner, Weather Risk detection, and Fertilizer Recommendation.
- AI Powered EdTech Platform** | [Repo](#)
- Built an AI-powered educational platform that assists students with personalized learning through conversational AI and automated content generation.
 - Includes AI chatbot, Quiz generator, PDF/Summary/Flashcard generator, and a feature that suggests courses from various platforms.
- Multi-Disease Prediction** ([Link](#)) and **Bone Fracture Detection** ([Link](#))
- Machine learning models to predict diabetes, heart disease, and Parkinson's from medical datasets, supporting early diagnosis.
 - YOLOv8-based model for detecting bone fractures from medical images.

ACHIEVEMENTS

- National Reliance Foundation Scholar** – Awarded the Reliance Undergraduate Scholarship.
- National TechVortex 3.0 (2026)** – 1st Prize at national level techathon held at SIT, Pune.
- Innovate You Techathon 3.0 (2026)** – Won Best Solution Prize (National-Level Hackathon).
- Patent Granted** – Farmazo – AI-Powered Farmer–Company Trade Platform.
- National I2I Hackathon** – Selected in top 7 project and received funding from Eton for project.
- Smart India Hackathon 2024** – Top 50/250+ teams for a farmer market access app; advanced to next round.
- TechnoFEA 2.0 Finalist** – Top 10 in VIIT Pune's flagship technical competition.
- 2 Fast 2 Hack Hackathon** – Top 5 at Symbiosis Institute of Technology for innovative problem-solving.

CERTIFICATIONS

- DataFlair Web Development Certification** – Completed comprehensive training in full-stack web development.
- Claude 101 Certification** – Gained foundational knowledge of AI systems and prompt engineering using Claude for practical applications.
- CCNA: Introduction to Networking** – Certified in networking fundamentals, routing, switching, and security.
